Tuesday, May 4, 1993

A Responsiveness Summary was developed by the Department of Energy to answer public questions and concerns about the Transition Plan raised during the public comment period from October 8 to December 14, 1992.

The Transition Plan describes a strategy and outlines a schedule for preparing Rocky Flats Plant facilities for cleanup, deactivation, decontamination, and conversion. The comments addressed in the Responsiveness Summary will be considered in future documents updating Transition Planning Activities.
